

Safety Program Resource List

Introduction

Members of the Saskatchewan Mining Association use many suppliers and resources to help build and maintain their safety programs. Safety has become an integral part of our mining operations with companies employing full time safety professionals. The Safety Committee within the Saskatchewan Mining Association is an active group of members who work together to provide ongoing support to the different mining companies. Many of the companies and sites share safety material with each other to help with safe work plans or training material.

The following is a list of resources available to assist in the development of safety programs.

Saskatchewan Occupational Health and Safety Division; 1-800-567-7233

Information available either on their web site or by calling their office, publications that lay out the requirements for a Health and Safety Program (H&S Program).
