Accounting, Economics, Mathematics

CAREER PROFILE >>

Procurement Specialist

Name: Milton Greeyes

Home Community: Muskeg Lake Cree Nation, SK

Education: Bachelor of Commerce, Marketing; St. Mary's University, Halifax, Nova Scotia

Employer: Nutrien Ltd.

Details of the Job: Working in a procurement department gives you the chance to touch a lot of different aspects of the business like legal, operations, finance etc. Procurement isn't really a job that has a specific education but the closest to job specific education would be the Supply Chain Management Association Designation. In a procurement department you will see a variety of different educational backgrounds from engineers, business, accountants, economists, etc. Working on Diversity & Inclusion inside the procurement department is a great opportunity to work with all types of suppliers who are making an effort to include D&I into their business in different ways that makes sense for their business.

A Typical Day: Depending on the day I could have several meetings with internal folks and/or suppliers on a variety of items. The great thing about doing what I do is it offers great variety where everyday isn't the same.

Skills Needed: Good time management, be personable, able to change to an evolving environment, able to see the good you are doing in the community through Diversity & Inclusion.

About the Job: You have to enjoy learning new things to become a better procurement professional. Enjoy working with others because in the procurement world you will work with a lot of different internal and external stakeholders.

My Education Path: Highschool diploma from Athol Murray College of Notre Dame, graduated with a Business degree with a major in Marketing from Saint Mary's University in Halifax Nova Scotia, recently completed the Supply Chain Management Association (SCMA) Diploma Program.
